

What is iCCM?

A strategy to bring case management of childhood illness from the health facility to the community.

Why do we need iCCM?

75% of *child* deaths under 5 are due to:

- newborn deaths
- pneumonia
- diarrhea
- malaria

Health workers **i** in the **Community** are equipped to manage and assess these top killers.

C

M

How **Integrated Community Case Management (iCCM)** Can Help Us **#DefeatMalaria**

How does iCCM work?

Trained community health workers...

If not immediately treatable...

TEST & TREAT

Test and give child treatment

REFER

Refer child to health center

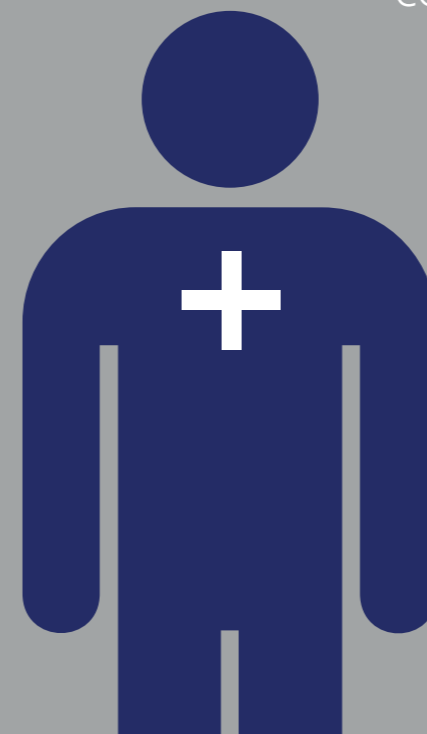

PREVENT

Teach healthy habits to prevent childhood illnesses

How is iCCM effective?

Investing in iCCM ensures community health workers can:

- ✓ **DELIVER** integrated interventions directly in communities
- ✓ **TREAT** major childhood illnesses like **malaria**
- ✓ **SAVE** lives
