Indonesia

This profile presents an overview of the current equity in the coverage of key reproductive, maternal, and child health interventions in Indonesia. Equity in coverage has been presented across wealth quintiles, education level, and rural versus urban residence. Changes in equity by wealth over time are also presented to highlight improvements or challenges in improving disparities in coverage or progress against a given indicator.

Coverage Disparities for Key RMNCH Indicators

- **4+ Antenatal Care Visits**
  - 2012-DHS Wealth Education Geography

- **Skilled Birth Attendance**
  - 2012-DHS Wealth Education Geography

- **Early Initiation of Breastfeeding**
  - 2012-DHS Wealth Education Geography

- **DTP3**
  - 2012-DHS Wealth Education Geography

- **SP/Fansidar in Pregnancy (2+ dose)**
  - 2012-DHS Wealth Education Geography

- **Care Seeking for Pneumonia (Child)**
  - 2012-DHS Wealth Education Geography

- **Household Handwashing Source**
  - 2012-DHS Wealth Education Geography

- **Not Nutritionally Stunted**
  - 2012-DHS Wealth Education Geography

- **HIV Testing Women**
  - 2012-DHS Wealth Education Geography

Changes in Coverage Disparities by Wealth Quintile over Time

(Q5-Q1 coverage disparity reported as text labels; "0.0" reported difference implies full quintile data was not available)

- **Breakdown by Indicator**
  - FP Met (% Cov)
  - ANC4+ (% Cov)
  - EIB (% Cov)
  - DTP3 (% Cov)
  - SP during Pregnancy (% Cov)
  - HH Handwas (% Children)
  - HIV Test (F)

Notes

* Data for stunting was re-calculated to align with the direction of all other variables to aid in interpretation; displayed data is calculated as 100% minus reported prevalence of stunting

Data Sources: Countdown to 2015; DHS; MICS

Note: Blank box implies data was unavailable
